Second and Copper.

Storage at reasonable rates in the largest and best built warehouse in the city.

ECLIPSE OF SUN FROM ASTRONOMERS' STAND-POINT HUGE SUCCESS

(Continued from Page One.)

That the photographic and spectroscopic work will produce most successful results, was the opinion of Dr. S. A. Mitchell, director of Lander McCormick Observatory, University of Virginia. He has been busy and in comparing observations with those of other observers with these of today, he said.

The conditions were better than during the Sumatra eclipse, but not quite so good as in Spain, where an absolutely clear sky prevailed. However, we certainly will get excellent results from our work today and the expedition was a success, and very much worth while.

The first contact reported from the five inch equatorial by Mr. Hammond and flashed to the naval observatory at Washington, was at forty-six minutes and fifty-five seconds past two o'clock, five seconds earlier than figured, due to a slight error in computation of the moon's position.

According to Dr. Mitchell, the first contact of eclipse in Spain was ten seconds early, showing close calculations in the present eclipse, that then.

DENVER OBSERVERS NOT ABLE TO SEE ECLIPSE
Denver, Colo., June 8.—Astronomers from the staff of the Yerkes Observatory of the University of Chicago and other observers who gathered at the University of Denver observatory today to make observations of the total eclipse of the sun found that their elaborate preparations went for naught as a result of heavy clouds which covered the sky during the greater part of the eclipse.

The cloud bank arose shortly before the eclipse began and the sun did not break through until fifty minutes after the eclipse had passed totally.

The scientists swallowed their disappointment and deserting their instruments, gathered in the observatory yard to observe the color effect on the clouds of the approaching darkness. When the eclipse was total and a sepulchral-like pallor spread, deepening into such darkness that automobile headlights were lighted, a brilliant electrical storm was visible in the mountains many miles to the southwest.

When the sun finally broke through the clouds at 6:05 p. m., only the upper left hand corner of the sun was obscured by the moon and telescopic photographs were taken but Dean Herbert A. Howe, of Denver University, who directed the work here, said these observations were of little importance as the principal data sought could be obtained by observations made only when the eclipse was total.

As the eclipse approached totality the shadow could be seen sweeping

across the clouds and for 89 seconds the darkness approached that of night. As the shadow swept off to the southeast it could be traced in the clouds, while in the northwest a greenish-purple pallor gradually brightened into the light of full day.

CLOUDS CAUSE ANXIETY AT GREEN RIVER, WYO.

Green River, Wyo., June 8.—Clouds appearing during the partial phase when today's eclipse of the sun neared totality, caused much anxiety to the many astronomers gathered here to make observations, but a sketch of the corona and a number of photographs were secured by two astronomers who drove swiftly to a point three and one-half miles north of the observing station, and there, it is thought, were the only photographs secured.

COLORADO DEMOCRATS TO MEET ON JULY 22

Denver, Colo., June 8.—The democratic state central committee in session here this afternoon decided to hold the general assembly in Denver July 22. It had been planned originally to hold the assembly July 16, but it was postponed to the later date at the request of the farmers who said that July 16 was too early for them to leave their work.

The committee also decided on the assembly apportionment. Each county will be allowed three delegates at large and one additional delegate for every 200 population. This will make a total of 952 delegates.

OUTLOOK GOOD IN BUSINESS WORLD

New York, June 8.—Changes in the war situation, the rapidly expanding national budget, brilliant crop prospects and general business conditions engrossed the attention of the financial community this week, very often to the exclusion of the stock market. Events on the western front gave added confidence to the statement of the French premier pointing to the increased influence of this country in the world conflict. The quick subsidence of alarm over the operations of enemy submarines in these waters was another reassuring factor.

Trading fell far below the active daily sessions in the last half of May due mainly to the withdrawal of public interest.

Chicago U. Loses Two.
Chicago, June 8.—Stewart Cochran, a tackle on the University of Chicago football eleven, and Bradford Smith, a Maroon shortstop, will be lost to athletics this season. They are awaiting call to attend the naval officers' material school in Chicago. The loss of Cochran leaves only three of the twelve men who won "C" in football last fall. He is a sophomore and lives in Elkhart, Ind. Captain Berles, Higgins, Rouse, Gorkas, Jackson, Moulton and Mellin also have enlisted. Brondinski is in the medical school preparing for hospital service, leaving Locke, Elton and McDonald as the only "C" men who may return.

Francis in Petrograd.
Washington, June 8.—The presence in Petrograd of Ambassador Francis was reported to the state department today. Other dispatches to the department said conditions in Petrograd were bad, especially as to food supplies.

The Doctor Away From Home When Most Needed.

People are often very much disappointed to find that their family physician is away from home when they most need his services. Diseases like pain in the stomach and bowels, colic and diarrhoea require prompt treatment, and have in many instances proven fatal before medicine could be procured or a physician summoned. The right way is to keep at hand a bottle of Chamberlain's Colic and Diarrhoea Remedy. No physician can prescribe a better medicine for these diseases. By having it in the house you escape much pain and suffering and all risk. Buy it now; it may save life.

OFFICIAL STATEMENTS FRENCH

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
Paris, June 8.—Heavy counter attacks launched by the Germans around Chezy and Dammard, to the northwest of Chateau Thierry broke down under the French guns, according to the war office announcement tonight. The enemy suffered serious losses. The statement says:

"There was quite lively artillery action in the neighborhood of Hangard-En-Santerre, between the Oise and the Aisne and south of the Aisne. We continued our progress in the region of Veully-La-Poterie and Bussières and penetrated the village to Bloupy.

"The enemy tried to check the advance which we made yesterday at Chezy and Dammard, launching violent counter attacks in this region. Our troops broke down all of the attacks of the enemy who suffered heavy losses. We have maintained all our gains.

"Calm prevailed everywhere else."

GERMAN

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
Berlin, June 8.—Attacks by allied troops around Chateau Thierry and counter attacks on the Aisne river resulted in "unimportant gains of territory," according to the official report from general headquarters today. The text of the statement reads:

"Army of Crown Prince Rupprecht: Artillery firing and reconnoitering engagements revived intermittently. "Army of tactical divisions: Renewed enemy attacks northwest of Chateau Thierry and counter attacks to recover the line lost on the Aisne only brought him small gains of territory. Several attacks by French American and British regiments broke down with heavy losses.

"On the rest of the front the situation is unchanged."

PLOT TO LIBERATE EX-EMPEROR FAILS

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
Amsterdam, June 8.—The discovery of a plot to free the former emperor of Russia while he was confined at Tobolsk, to take him to Sweden and thence to America, reported in German newspapers received here.

According to the accounts published the chief conspirator was Prince Paul Dolgorouki, grand marshal of the imperial Russian court under Emperor Nicholas, who placed \$300,000 rubles at his disposal with a view to bribe all the members of his guard.

The plot failed, the papers say, owing to the indiscretion of a servant, who divulged the plan.

What U.S. Is Doing at Home to Combat German Influence

U. OF N. PROFESSORS EXONERATED BY BOARD
Lincoln, Neb., June 8.—All evidence in the hearing conducted by the board of regents of the University of Nebraska into charges by the state council of defense that some of the university's instructors have not been aggressively American in their attitude on the war, was completed today. Final arguments by attorneys for and against the accused professors will be heard by the board next Monday.

Complete exoneration of any suspicion of lack of aggressive support to the government was given by the regents today to six persons, including several professors whose names were mentioned during the investigation. They were Professors E. H. Hume, John S. Senn, A. P. Sheldon, A. D. Schrage, Mary Foster and Annis Charikin, secretary of the Nebraska Alumni association. All six of these cases had previously been tentatively dismissed by the board.

The cases of the following professors now remain before the board for action after final arguments are heard:

H. K. Wolfe, C. E. Persinger, G. W. A. Luckey, L. E. Aylesworth, L. B. Tuckerman, Henry Blumberg, H. W. Caldwell, Erwin Hopt and Paul H. Grummann.

Today's session of the board was occupied by the hearing of testimony from Prof. C. E. Persinger and L. E. Aylesworth, both of whom testified in their own behalf.

RED CROSS SLACKER IS MADE TO COME ACROSS

Bisbee, Ariz., June 8.—Angelo Perez, a Spaniard, who has worked in the mines of the Warren district for eight years and acquired several pieces of property here, was ridden through the three cities of this district today on the radiator of a motor truck while hundreds of miners rang cow bells, blew horns and shouted words of defiance to the Red Cross national war fund and had left his job at the Junction mine to evade solicitors.

Miners took him from the streets in Lowell and mounted him on the automobile. A banner bearing the words "Red Cross slacker" was draped over his chest. In the presence of several hundred spectators he was forced to kiss the Red Cross flag. Later he was thrown in a water tank and rolled in the mud.

After the demonstration Perez gave \$25 to the Red Cross solicitors.

New Shipbuilding Record.

Orange, Tex., June 8.—What is claimed to be the world's largest shipbuilding was eclipsed this morning at the national shipyard here, when the work of erecting seventy-nine frames in one of the world's largest wooden steamship hulls was accomplished in thirty hours and thirty minutes. This beats the world's record made on the Pacific coast, where seventy-nine frames of similar size and type were erected in forty-four hours.

ENEMY EFFORT IN VALLEY OF MARNE IS FADING AWAY

Prisoners Taken by French and Americans Appear to Be Thoroughly Exhausted and Depressed Over Situation.

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
With the French Army in France, June 8 (By the Associated Press).—The second Franco-American attack in the neighborhood of Veully-La-Poterie and Boursches was a brilliant success to the allied arms. It was continued yesterday with an advance in the Chezy sector further northwest on the line. The enemy seemed somewhat disheartened, replying only feebly to the allied fire. Prisoners arriving in the rear in small batches appear to be thoroughly exhausted and depressed by the turn affairs are taking.

Quite important advantages have been gained by the allies in the course of numerous small infantry engagements during the past two days. The French, American and British troops have participated in these actions and the bag of prisoners is considerable. The tactical situation of the allies is improved by the reconquest of a number of dominant points. As a general rule the great German effort in the valley of the Marne seems to be fading away as the enemy comes in contact with something approaching his numbers.

CANNON INCESSANTLY HARRY HUN BATTERIES

With the French Army in France, June 8 (By the Associated Press).—The revival of artillery activity in the sector between Noyon and Montdidier is claiming attention today. Whether the Germans intend to deliver another blow here with their still powerful reserves cannot be foreseen, but the indications point to such an event. The German gunners in this region are active in securing ranges on allied positions. This work, however, is carried out with difficulty as the allied cannon incessantly harry the enemy's emplacement and bombard the rear of his lines.

Most of the German shock divisions used in the Marne battlefield have been withdrawn from that area.

ATTEMPT TO CAPTURE RHEIMS IS A FAILURE

With the French Army in France, June 8 (By the Associated Press).—The most severe among the earlier battles recently in the Marne-Rheims region was in the St. Etienne-Champagne and Champliat, westward from Rheims.

The Germans launched a serious attack here at dawn Thursday morning, along a four mile front. They planned to pierce the allied lines to a depth of about half a mile, which would permit them to cut flank Rheims mountain and thus capture the city. It would have reduced at the same time the salient held by the allies which endangers a large part of the line.

The village and spur of Bligny fell into their hands when they came forward in dense waves, but the British immediately counter attacked and took the spur.

Simultaneously the French counter attacked and reached the outskirts of Bligny and on a second attempt today recaptured the village and reestablished the line.

STRIKE IN RANKS OF A. F. OF L. SETTLED

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
St. Paul, Minn., June 8.—Internal disputes regarding jurisdiction over certain kinds of work were ironed out at the closing sessions of several branches of the American Federation of Labor here today. The sessions preceded the annual convention of the federation which opens Monday.

After lengthy debate the building trades department voted to place reformed construction work under the jurisdiction of the carpenters union. This action nullified a previous decision in favor of several iron workers' unions.

President James O'Connell, Washington, and Secretary A. F. Berria, Washington, were re-elected by the metal trades department. In his closing address, President O'Connell declared labor would never get back to pre-war conditions.

"Either semi-normal or abnormal conditions will obtain," he said. "Gradually we are being pushed into a new condition of life. In the end, however, I believe a new desire for greater things will come."

ALASKAN FISHERY PRODUCTS VALUABLE

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
Washington, June 8.—Fishery products of Alaska in 1917 were valued at \$51,495,246, or more than seven times the purchase price paid by the United States to Russia for the entire territory, according to the bureau of fisheries.

Salmon represented 95 per cent of the year's total catch, amounting to \$47,718,881, as compared with \$17,297,226 for halibut, \$767,729 for herring, and \$744,976 for cod. Whaling operations returned products worth \$653,852.

This unprecedented yield of fishery products in Alaska at a time when the world is in need of food is an achievement for which the country may justly feel gratified," said an announcement by the bureau.

New Takes Airplane Trip.

Indianapolis, Ind., June 8.—United States Senator Harry S. New, of Indiana, who left the Indianapolis speedway at 3:45 o'clock this afternoon in an airplane for a trip to Dayton, Ohio, arrived there safely making the trip in an hour, according to a telegram received by Mrs. New this evening.

All Tides Abolished.
Washington, June 8.—Embassy reports to the state department announce that the Russian soviet republic has abolished all titles of ambassadors and ministers. Both their own and foreign representatives are called without distinction, "representative plenipotentiaries."

Kaiser's Cup, Like His Promises, Is of Little Value

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
New York, June 8.—German proof of the saying that all is not gold that glitters, was forthcoming here today with the disclosure that the "magnificent" cup which Emperor Wilhelm awarded to the American winner of his ocean yacht race in 1905 was not gold and was not worth \$5,000, as was announced at that time. It was made of silver, with a thin veneer of gold and was worth scarcely \$40.

The deception recoiled against the emperor during the recent Red Cross drive, when it was revealed today, as it was auctioned and re-auctioned until it added \$125,000 to the nation's mercy fund.

DROUTH IS BROKEN IN WESTERN TEXAS

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
Dallas, Tex., June 8.—The long drought which has prevailed in west Texas for two or more years, causing little less than disaster to the cattle raising industry of Texas, has been partly if not wholly broken. Three good, soaking rains fell in that district within the first seventeen days of May. Grass is now coming out, water holes have been partly filled and a general spirit of optimism prevails with the cattlemen, many of whom staked fortunes on the effort to hold out.

Ranchmen who had waited from month to month for the rains shipped thousands of heads of cattle out of this district to other ranges. Many dollars were spent by the stockmen on feed to keep alive those few cattle that remained on the ranges. They declare that had the rain been delayed another six weeks the plains of Texas would have been practically deserted of cattle.

All of Texas west of a line drawn north and south through San Antonio constituted the drought district, practically all of which is devoted to the cattle raising industry. Part of the district, however, contains some agricultural land, devoted mostly to truck farming. Little cotton or corn is grown.

The drought began in some sections late in the summer of 1914, and almost ever since the cattlemen have had a fight on their hands to save the herds with which the ranches were populated at that time. In 1915 the situation grew more serious and the rainfall was far below normal. Early in 1916 a large part of the district had fair rains, but there were many large areas which had none and others which had rain fell so rapidly that it did little good. Throughout the summer of 1916 all through 1917 and well into 1918 conditions grew steadily worse.

Pioneers of west Texas declare it was the worst dry spell that has fallen over that section in a century. Dust storms which swept the section a few weeks prior to the rains were the worst and most severe experienced in a generation. In San Angelo the dust storm was so severe that all outside work had to be suspended and the sky was so dark that it was necessary to use electric lights for indoor work.

A general influx of cattle which had been shipped out of west Texas is expected to begin soon. Cattlemen, however, point out that it will require years to stock the ranches as before the drought hit the ranges.

VICTORIA CROSSES ARE AWARDED THREE

(BY MORNING JOURNAL SPECIAL LEASED WIRE)
London, June 8 (via Ottawa).—Announcement of the award of three Victoria crosses, including one to Sergeant Albert Mountain, West Yorks, is made in the Official Gazette. Mountain's company was compelled to fall back before the advancing enemy forces. Volunteers for a counter-attack were called when Mountain and ten men stepped forward. He advanced on the flank with a Lewis machine gun and enfiladed an enemy patrol, of which about 100 were killed. Mountain rallied and organized the party for defense and covered the retirement of the rest of the company.

With one non-commissioned officer and four men he successfully held at bay 600 Germans for half an hour. Later he took command of a flank post and held on for twenty-seven hours until finally surrounded. Mountain was one of a few who managed to fight their way back.

Lame Back Relieved.

For a lame back apply Chamberlain's Liniment twice a day and massage the muscles of the back over the seat of pain thoroughly at each application.

GERMAN OFFICER TELLS STORY OF OPENING BATTLE

(BY MORNING JOURNAL SPECIAL LEASED WIRE)

London, June 8 (via Ottawa).—Reuter's correspondent at French headquarters telegraphs a letter written by a German officer giving a striking picture of the opening of the recent battle from the German viewpoint. It reads:

"On May 25 we had already marched for three nights to reach our destination. By day one hardly ever saw a soldier but at night the roads swarmed with troops, guns and convoys. Half an hour after midnight on the morning of May 27 we arrived on the road just behind the first line. There was no sleep for me for a creeping barrage opened from 3,000 guns. The earth trembled and the moonlight was obscured by clouds of vapor from the smoke shells.

"The infantry attack began at 3 o'clock and fifteen minutes afterward

we passed the wire entanglements and were bursting into the enemy positions. At the end of two hours we had fought our way through the enemy positions to the Chemin Des Dames, opening a passage for the artillery. By evening we had pushed the French beyond the canal and over the Aisne and then began a fresh pursuit. Among the prisoners were British, Italian, American and Arabs."
